Strategic Progress of Ford+ Growth Plan, Solid Financials in '21 Position Company for Connected EV Leadership in 2022, Beyond

- Fourth-quarter results include revenue of \$37.7 billion, net income of \$12.3 billion, adjusted EBIT of \$2.0 billion
- Full-year net income was \$17.9 billion; company adjusted EBIT of \$10.0 billion at midpoint of \$9.6 billion to \$10.6 billion guidance range, after reclassifying Q1 Rivian gain
- Global production capacity of iconic, high-volume BEVs to be at least 600,000 by 2023
- Full-year 2022 adjusted EBIT expected to be \$11.5 billion to \$12.5 billion, up 15% to 25%

DEARBORN, Mich., Feb. 3, 2022 – Ford today announced solid fourth-quarter and full-year operating results for 2021 despite persistent supply chain disruptions – a year the company said is most notable for rapid progress carrying out the ambitious Ford+ plan for growth and value creation, and establishing itself as a leader in must-have connected, electric vehicles.

"Financial performance is obviously critical," said President and CEO Jim Farley. "We're also proud that customers see how Ford is taking EVs mainstream, and have already ordered or reserved more than 275,000 all-electric Mustang Mach-E SUVs, F-150 Lightning pickups and E-Transit commercial vehicles – and we're breaking constraints to deliver every one of them as fast as we can."

Customers made Ford the No. 2 seller of electric vehicles in the U.S. in 2021, what Farley called "an important early step toward eventually being the true EV leader." Earlier, he said that the company will double worldwide EV manufacturing capacity to at least 600,000 by 2023 – and for fully electric vehicles to represent at least 40% of its product mix by 2030.

Company Key Metrics Summary

Fourth-quarter revenue (\$37.7 billion), net income (\$12.3 billion) and adjusted earnings before interest and taxes (\$2.0 billion) all were up from 2020. So, too, was Ford's performance against each of those measures for all of 2021. Full-year net income was \$17.9 billion; company adjusted EBIT for the year was \$10.0 billion.

Adjusted EBIT was squarely within the guidance range of \$9.6 billion to \$10.6 billion that Ford provided on Oct. 27, after <u>reclassifying its first-quarter 2021 gain on its investment in Rivian</u> following Rivian's Nov. 10 initial public offering. Automotive EBIT from outside North America was the company's highest in four years.

"Our team did a fantastic job working with partners to maximize component availability," said John Lawler, Ford's CFO. "We allocated those volumes to in-demand new vehicles like the Bronco (SUV) and Maverick (small pickup), profitable models like F-Series (trucks) and Transit, and customer orders."

For example, Ford worked with LG Energy Solution to improve battery supply for the Mustang Mach-E, expanding capacity three times over the past 10 months. Benefits from those increases will continue to accrue – to more than double originally contracted volumes by 2023.

Meanwhile, Lawler said, full-year benefits from strong mix and net pricing, as well as lower warranty costs, more than offset the effects of the production losses and higher commodity costs. As a result, automotive EBIT of \$7.4 billion and margin of 5.9% for 2021 were both significantly higher than in 2020.

Ford ended the quarter with more than \$36 billion in cash and \$52 billion in liquidity. Both measures included the company's investment in Rivian, which was valued at \$10.6 billion at the end of 2021. At the close of trading on Feb. 2, the value was \$6.6 billion.

During the fourth quarter, Ford, consistent with its focus on creating value for shareholders, reinstated a regular dividend of 10 cents per share.

The company's balance sheet was further strengthened in the quarter by repurchasing and redeeming \$7.6 billion in high-cost debt – also significantly reducing ongoing interest expenses. Around the same time, Ford introduced the North America auto industry's first fully integrated sustainable financing framework, which spans both the auto business and Ford Credit. In November, Ford issued its first green bond, the \$2.5 billion in proceeds from which are helping to fund BEV investments.

Business Unit Highlights

Ford's business in **North America** vividly illustrates how the company is winning customers and reaping benefits from, according to Farley, "without question, the most exceptional product lineup I've seen in my 30-plus years in this industry." The North America EBIT margin was 7.1% for the quarter and 8.4% for the year.

In Q4, strong demand for Bronco and Maverick – the North America SUV and truck of the year, respectively – along with Mustang Mach-E and Bronco Sport contributed to a two-point U.S. share gain, to 15%, making Ford the country's top-selling automaker.

A semiconductor-related supply shortfall accounted for a quarterly EBIT loss in **Europe**. Nonetheless, the underlying trajectory of the business continues to improve.

Ford Pro continues to figure prominently in the region, where Ford has now been the top commercial-vehicle brand for seven straight years. Ford gained CV share in both the fourth-

quarter and full-year 2021 – the latter approaching 15% – and presently has a record order bank for its Transit vans. E-Transit will be launched there in early 2022.

Ford Liive, the connected uptime system for commercial customers, is now available in nine European national markets. The application enabled an additional 28,000 days of vehicle availability in Q4.

In **China**, Ford recorded a fourth-quarter operating loss, but is expected to improve profitability in 2022.

Locally built Lincoln-brand vehicles are a huge part of Ford's turnaround there, positioning the company to be a significant player in the world's largest luxury car market. For the first time, Lincoln volumes in China were larger than those in the U.S. Full-year sales of Lincoln models were up nearly 50% from 2020, with the launch of the Lincoln Zephyr set for first-quarter 2022 and other new products from the brand forthcoming.

Ford's restructured, asset-light business unit in **South America** was again profitable and is now on a path toward growth. The company's profitable **International Markets Group**, which operates in about 100 markets in Asia, the Middle East and elsewhere, is preparing to introduce a next-generation version of its Ranger midsize pickup later this year.

Ford Credit, which will play a vital role in delivering exceptional customer value in the era of connected, zero-emission vehicles and services, again posted solid results in Q4, driving full-year earnings before taxes to \$4.7 billion.

Unfolding Ford+ Plan for Growth, Value Creation

Ford is relentlessly adding to Ford+ capabilities for connectivity and EVs. Since the company last announced quarterly results on Oct. 27, developments have included:

- The <u>launch of VIIZR</u>, a field-service tool for small-business customers built on the Salesforce platform
- Introduction of Ford Pro Charging, to provide commercial customers of all sizes a complete, seamless solution for charging their electric vehicles
- An initiative that allows plug-in EV owners in California to opt into <u>carbon-neutral charging at home</u>, a program of the California Air Resource Board's Low Carbon Fuel Standard
- A <u>five-year agreement with Stripe</u>, the economic-infrastructure company, to scale Ford's always-on, e-commerce capabilities for customers
- <u>Formation of Canopy</u>, a joint venture with ADT, for professional security monitoring and artificial intelligence-based camera technology that strengthens security of customers' new and existing vehicles of all makes.
- <u>Creation of Ford Pro Intelligence</u>, a cloud-based platform powering digital services to support commercial customer fleets.

Outlook

Strong customer appeal of Ford's new vehicles is driving optimism about 2022 – the first full production year for the award-winning Bronco and Maverick. So are the E-Transit and, soon, the F-150 Lightning, which are joining the Mustang Mach-E in the company's high-volume lineup of battery electric vehicles.

Lawler said Ford expects full-year 2022 adjusted EBIT to be even stronger – \$11.5 billion to \$12.5 billion, an increase of 15% to 25% over 2021. The high end of the adjusted EBIT range equates to a margin of 8% which, if achieved, would be one year earlier than the company's previous target. Adjusted free cash flow for the year is expected to be \$5.5 billion to \$6.5 billion.

Underlying assumptions for 2022 include:

- Significantly higher profits in North America, along with collective profitability in the rest of the world as the company benefits from its extensive global redesign
- Continued variability in supplies of key components, with full-year vehicle wholesales
 nonetheless being up about 10% to 15%, with a high single- to low double-digit decline in
 Q1, reflecting supplier shortages related to COVID shutdowns and semiconductors
- A strong pricing environment, though with a dynamic relationship between vehicle volumes and pricing
- Increased commodity costs, along with possible inflationary effects on a broad range of other expenses
- EBT from Ford Credit that remains strong, but lower than in 2021, and
- Ongoing investment in the Ford+ plan.

Ford plans to report its first-quarter 2022 financial results on Wednesday, April 27.

###

About Ford Motor Company

Ford Motor Company (NYSE: F) is a global company based in Dearborn, Michigan, that is committed to helping build a better world, where every person is free to move and pursue their dreams. The company's Ford+ plan for growth and value creation combines existing strengths, new capabilities and always-on relationships with customers to enrich experiences for and deepen the loyalty of those customers. Ford designs, manufactures, markets and services a full line of connected, increasingly electrified passenger and commercial vehicles: Ford trucks, utility vehicles, vans and cars, and Lincoln luxury vehicles. The company is pursuing leadership positions in electrification, connected vehicle services and mobility solutions, including self-driving technology, and provides financial services through Ford Motor Credit Company. Ford employs about 183,000 people worldwide. More information about the company, its products and Ford Motor Credit Company is available at corporate.ford.com.

Available after 8:00 p.m. ET on Feb. 3 and through Feb. 9

Webcast: shareholder.ford.com Toll-Free: 855.859.2056 International: +1.404.537.3406 Conference ID: 9318248

The following applies to the information throughout this release:

- See tables later in this release for the nature and amount of special items, and reconciliations of the non-GAAP financial measures designated as "adjusted" to the most comparable financial measures calculated in accordance with U.S. generally accepted accounting principles ("GAAP").
- Wholesale unit and production volumes include Ford and Lincoln brand vehicles produced and sold by Ford or our unconsolidated affiliates and Jiangling Motors Corporation ("JMC") brand vehicles produced and sold in China by our unconsolidated affiliate, and from Q2 2021 Ford brand vehicles produced in Taiwan by Lio Ho Group. Revenue does not include vehicles produced and sold by our unconsolidated affiliates. See materials supporting the Feb. 3, 2022, conference call at shareholder.ford.com for further discussion of wholesale unit volumes.

Cautionary Note on Forward-Looking Statements

Statements included or incorporated by reference herein may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are based on expectations, forecasts, and assumptions by our management and involve a number of risks, uncertainties, and other factors that could cause actual results to differ materially from those stated, including, without limitation:

- Ford and Ford Credit's financial condition and results of operations have been and may continue
 to be adversely affected by public health issues, including epidemics or pandemics such as
 COVID-19;
- Ford is highly dependent on its suppliers to deliver components in accordance with Ford's production schedule, and a shortage of key components, such as semiconductors, or raw materials can disrupt Ford's production of vehicles;
- Ford's long-term competitiveness depends on the successful execution of Ford+;
- Ford's vehicles could be affected by defects that result in delays in new model launches, recall campaigns, or increased warranty costs;
- Ford may not realize the anticipated benefits of existing or pending strategic alliances, joint ventures, acquisitions, divestitures, or new business strategies;
- Operational systems, security systems, vehicles, and services could be affected by cyber incidents, ransomware attacks, and other disruptions;
- Ford's production, as well as Ford's suppliers' production, could be disrupted by labor issues, natural or man-made disasters, financial distress, production difficulties, capacity limitations, or other factors;
- Ford's ability to maintain a competitive cost structure could be affected by labor or other constraints;
- Ford's ability to attract and retain talented, diverse, and highly skilled employees is critical to its success and competitiveness;
- Ford's new and existing products, digital and physical services, and mobility services are subject
 to market acceptance and face significant competition from existing and new entrants in the
 automotive, mobility, and digital services industries;
- Ford's near-term results are dependent on sales of larger, more profitable vehicles, particularly in the United States;
- With a global footprint, Ford's results could be adversely affected by economic, geopolitical, protectionist trade policies, or other events, including tariffs;
- Industry sales volume in any of Ford's key markets can be volatile and could decline if there is a financial crisis, recession, or significant geopolitical event;
- Ford may face increased price competition or a reduction in demand for its products resulting from industry excess capacity, currency fluctuations, competitive actions, or other factors;
- Inflationary pressure and fluctuations in commodity prices, foreign currency exchange rates, interest rates, and market value of Ford or Ford Credit's investments, including marketable securities, can have a significant effect on results;
- Ford and Ford Credit's access to debt, securitization, or derivative markets around the world at competitive rates or in sufficient amounts could be affected by credit rating downgrades, market volatility, market disruption, regulatory requirements, or other factors;
- Ford's receipt of government incentives could be subject to reduction, termination, or clawback;
- Ford Credit could experience higher-than-expected credit losses, lower-than-anticipated residual values, or higher-than-expected return volumes for leased vehicles;

- Economic and demographic experience for pension and other postretirement benefit plans (e.g., discount rates or investment returns) could be worse than Ford has assumed;
- Pension and other postretirement liabilities could adversely affect Ford's liquidity and financial condition;
- Ford and Ford Credit could experience unusual or significant litigation, governmental investigations, or adverse publicity arising out of alleged defects in products, services, perceived environmental impacts, or otherwise;
- Ford may need to substantially modify its product plans to comply with safety, emissions, fuel economy, autonomous vehicle, and other regulations;
- Ford and Ford Credit could be affected by the continued development of more stringent privacy, data use, and data protection laws and regulations as well as consumers' heightened expectations to safeguard their personal information; and
- Ford Credit could be subject to new or increased credit regulations, consumer protection regulations, or other regulations.

We cannot be certain that any expectation, forecast, or assumption made in preparing forward-looking statements will prove accurate, or that any projection will be realized. It is to be expected that there may be differences between projected and actual results. Our forward-looking statements speak only as of the date of their initial issuance, and we do not undertake any obligation to update or revise publicly any forward-looking statement, whether as a result of new information, future events, or otherwise. For additional discussion, see "Item 1A. Risk Factors" in our most recent Annual Report on Form 10-K, as updated by subsequent filings with the United States Securities and Exchange Commission.

Non-GAAP Financial Measures That Supplement GAAP Measures

We use both GAAP and non-GAAP financial measures for operational and financial decision making, and to assess Company and segment business performance. The non-GAAP measures listed below are intended to be considered by users as supplemental information to their equivalent GAAP measures, to aid investors in better understanding our financial results. We believe that these non-GAAP measures provide useful perspective on underlying operating results and trends, and a means to compare our period-over-period results. These non-GAAP measures should not be considered as a substitute for, or superior to, measures of financial performance prepared in accordance with GAAP. These non-GAAP measures may not be the same as similarly titled measures used by other companies due to possible differences in method and in items or events being adjusted.

- Company Adjusted EBIT (Most Comparable GAAP Measure: Net Income / (Loss) attributable to Ford) Earnings Before Interest and Taxes (EBIT) excludes interest on debt (excl. Ford Credit Debt), taxes and pre-tax special items. This non-GAAP measure is useful to management and investors because it focuses on underlying operating results and trends, and improves comparability of our period-over-period results. Our management ordinarily excludes special items from its review of the results of the operating segments for purposes of measuring segment profitability and allocating resources. Pre-tax special items consist of (i) pension and OPEB remeasurement gains and losses, (ii) gains and losses on investments in equity securities, (iii) significant personnel expenses, dealer-related costs, and facility-related charges stemming from our efforts to match production capacity and cost structure to market demand and changing model mix, and (iv) other items that we do not necessarily consider to be indicative of earnings from ongoing operating activities. When we provide guidance for adjusted EBIT, we do not provide guidance on a net income basis because the GAAP measure will include potentially significant special items that have not yet occurred and are difficult to predict with reasonable certainty, including gains and losses on pension and OPEB remeasurements and on investments in equity securities.
- Company Adjusted EBIT Margin (Most Comparable GAAP Measure: Company Net Income / (Loss) Margin) Company
 Adjusted EBIT Margin is Company Adjusted EBIT divided by Company revenue. This non-GAAP measure is useful to
 management and investors because it allows users to evaluate our operating results aligned with industry reporting.
- Adjusted Earnings / (Loss) Per Share (Most Comparable GAAP Measure: Earnings / (Loss) Per Share) Measure of Company's diluted net earnings / (loss) per share adjusted for impact of pre-tax special items (described above), tax special items and restructuring impacts in noncontrolling interests. The measure provides investors with useful information to evaluate performance of our business excluding items not indicative of the underlying run rate of our business. When we provide guidance for adjusted earnings / (loss) per share, we do not provide guidance on an earnings / (loss) per share basis because the GAAP measure will include potentially significant special items that have not yet occurred and are difficult to predict with reasonable certainty prior to year-end, including pension and OPEB remeasurement gains and losses.
- Adjusted Effective Tax Rate (Most Comparable GAAP Measure: Effective Tax Rate) Measure of Company's tax rate
 excluding pre-tax special items (described above) and tax special items. The measure provides an ongoing effective rate which
 investors find useful for historical comparisons and for forecasting. When we provide guidance for adjusted effective tax rate, we
 do not provide guidance on an effective tax rate basis because the GAAP measure will include potentially significant special
 items that have not yet occurred and are difficult to predict with reasonable certainty prior to year-end, including pension and
 OPEB remeasurement gains and losses.
- Company Adjusted Free Cash Flow (FCF) (Most Comparable GAAP Measure: Net Cash Provided By / (Used In)
 Operating Activities) Measure of Company's operating cash flow excluding Ford Credit's operating cash flows. The measure contains elements management considers operating activities, including Automotive and Mobility capital spending, Ford Credit distributions to its parent, and settlement of derivatives. The measure excludes cash outflows for funded pension contributions, global redesign (including separations), and other items that are considered operating cash flows under GAAP. This measure is useful to management and investors because it is consistent with management's assessment of the Company's operating cash flow performance. When we provide guidance for Company Adjusted FCF, we do not provide guidance for net cash provided by / (used in) operating activities because the GAAP measure will include items that are difficult to quantify or predict with reasonable certainty, including cash flows related to the Company's exposures to foreign currency exchange rates and certain commodity prices (separate from any related hedges), Ford Credit's operating cash flows, and cash flows related to special items, including separation payments, each of which individually or in the aggregate could have a significant impact to our net cash provided by / (used in) our operating activities.
- Adjusted ROIC Calculated as the sum of adjusted net operating profit / (loss) after-cash tax from the last four quarters, divided by the average invested capital over the last four quarters. This calculation provides management and investors with useful information to evaluate the Company's after-cash tax operating return on its invested capital for the period presented.
 Adjusted net operating profit / (loss) after-cash tax measures operating results less special items, interest on debt (excl. Ford Credit Debt), and certain pension / OPEB costs. Average invested capital is the sum of average balance sheet equity, debt (excl. Ford Credit Debt), and net pension / OPEB liability.

Note: Calculated results may not sum due to rounding

Net Income / (Loss) Reconciliation To Adjusted EBIT (\$M)
