

1. TANGERINES.

1.1. OKITSU TANGERINE.

Early tangerine, without seeds, rounded, flattened in the poles, medium size and green yellowish when ripened. The rind is a bit coarse. The pulp is very tender, of orange-reddish colour.

- Harvest date: second fortnight of February and March.
- °Brix: 9,8.
- Acidity: 1,15.
- Ratio: 8,7.
- Juice percentage: 50%.
- Presentation: Plate box 10 Kg.
- Size: 140-130-120-110-100-90-80-75-70-66-60-54.

1.2. NOVA TANGERINE.

Semi-early tangerine. medium size, of an attractive and quite shiny orange-reddish colour. The rind is thin and smooth, a bit glued to the segments, especially in the beginning of the ripening period. The pulp is firm, of intense orange colour and of a distinctive sweet taste. The soluble solid/acidity relation is well-balanced.

- Harvest date: second fortnight of February and March.
- °Brix: 9,8.
- Acidity: 1,15.
- Ratio: 8,7.
- Juice percentage: 50%.
- Presentation: Plate box 10 Kg.
- Size: 140-130-120-110-100-90-80-75-70-66-60-54.

1.3. ELLENDALE TANGERINE.

It is a variety of late ripening, medium to large size (70-80mm), of intense orange colour and of easy peeling. The pulp and juice are of excellent colour and taste, with a soluble solid/acidity relation high and well balanced.

- Harvest date: July and August.
- °Brix: 14,9.
- Acidity: 1,2.
- Ratio: 12,4.
- Juice percentage: 54%.
- Presentation: Plate box 10 Kg.
- Sizes: 140-130-120-110-100-90-80-75-70-66-60-54.

1.4. W. MURCOTT TANGERINE.

Tangerine of semi-late ripening, with fruits of flattened shape, with an intense orange-reddish rind, quite thin also. It is a variety of early peeling, without seeds, with a suitable level of juice, of pleasant taste, soft and sweet and with a right balanced acidity.

- Harvest date: second fortnight of June, July and August.
- °Brix: 12,8.
- Acidity: 0,95.
- Ratio: 13,45.
- Juice percentage: 53%.
- Presentation: Plate box 10 Kg.
- Sizes: 140-130-120-110-100-90-80-75-70-66-60-54.

1.5. H. MURCOTT TANGERINE.

Late tangerine, with seeds, excellent intern quality. Medium size, firm, flattened and of orange-yellowish colour. The rind is thin, quite glued to its segments but these are removable without major difficulties. It possesses a high content of juice, considerably sweet and of low acidity.

- Harvest date: July, August and September
- °Brix: 10,8.
- Acidity: 0,81.
- Ratio: 13,45.
- Juice percentage: 57%.
- Presentation: Plate boxo 10 Kg.
- Sizes: 140-130-120-110-100-90-80-75-70-66-60-54.

1- ORANGES.

2.1. NAVEL ORANGE.

Orange navel, semi-early, without seeds. From medium to large size and of elliptical shape. The rind has an attractive orange-reddish colour. The pulp texture is medium.

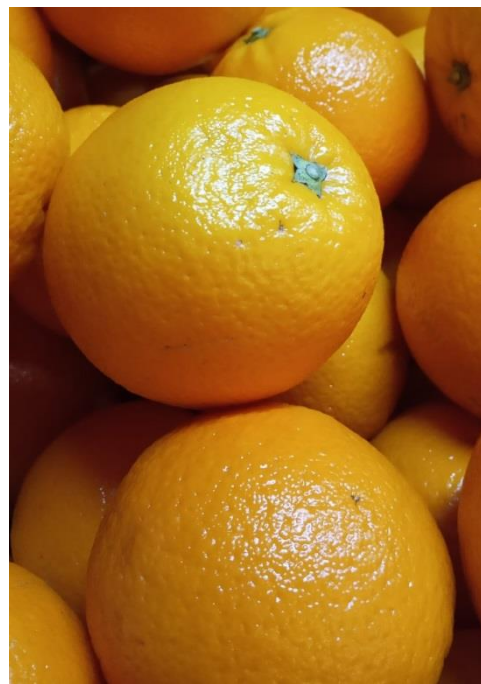

- Harvest date: July, August and September
- °Brix: 13,1.
- Acidity: 0,70.
- Ratio: 18,7.
- Juice percentage: 45%.
- Presentation: Telescopic box of 15 Kg.
- Sizes: 150-138-125-113-100-88-80-72-64-56-48-40-36.

2.2. SALUSTIANA ORANGE.

It is an early ripening orange, without seeds. The fruit is of an internal and external excellent quality, rounded shaped and flattened in the poles. The rind is of a pale orange colour. The pulp is melting with an even relation, a little low in acidity, but a with a high percentage of juice.

- Harvest date: April and May
- °Brix: 10,6.
- Acidity: 1,5.
- Ratio: 7,2.
- Juice percentage: 51%.
- Presentation: Telescopic box of 15 Kg.
- Sizes: 150-138-125-113-100-88-80-72-64-56-48-40-36.

2.3. VALENCIA SEEDLESS ORANGE.

It is an orange of semi-late ripening and without seeds. Oval shaped fruit with an intense orange colour rind and quite thin. The juice possesses a relation between soluble solids and acidity correctly balanced, with a high percentage of juice.

- Harvest date: August
- °Brix: 11,8.
- Acidity: 1,74.
- Ratio: 6,83.
- Juice percentage: 55%.
- Presentation: Telescopic box of 15 Kg.
- Sizes: 150-138-125-113-100-88-80-72-64-56-48-40-36.

2.4. VALENCIA LATE ORANGES.

Late ripening orange with 4-5 seeds per fruit. It is rounded shaped. Its rind is of an intense orange colour and thin.

- Harvest date: second fortnight of August until December
- °Brix: 11,5.
- Acidity: 1,5.
- Ratio: 7,8.
- Juice percentage: 55%.
- Presentation: Telescopic box of 15 Kg.
- Sizes: 150-138-125-113-100-88-80-72-64-56-48-40-36.
